DASHBOARD INSIGHTS

Meta Ad Performance Analysis

What the dashboard shows about reach, engagement, conversions and budget, and what to do next.

IMPRESSIONS	CTR	PURCHASE RATE	BUDGET
216K	11.76%	0.61%	2.5M

KPI Metrics

IMPRESSIONS
216K
Total times ads were shown. Good reach.

CLICKS
25.4K
People who clicked on the ads.

SHARES
1.3K
Engagement beyond paid reach.

COMMENTS
2.6K
Engagement beyond paid reach.

PURCHASES
1.3K
Real customer acquisitions from ads.

ENGAGEMENTS
29K
Clicks, shares and comments combined.

TOTAL BUDGET
2.5M
Total ad spend.

AVG BUDGET / CAMPAIGN
50.7K
Suggests multiple campaigns were run.

CTR
11.76%
Strong, well above the industry average of about 1–2%.

ENGAGEMENT RATE
13.56%
Very healthy. Content resonates.

CONVERSION RATE
5.21%
Of clicks, purchases. Good, but landing pages can lift it.

PURCHASE RATE
0.61%
Of impressions, purchases. Room to optimise.

Funnel at a glance

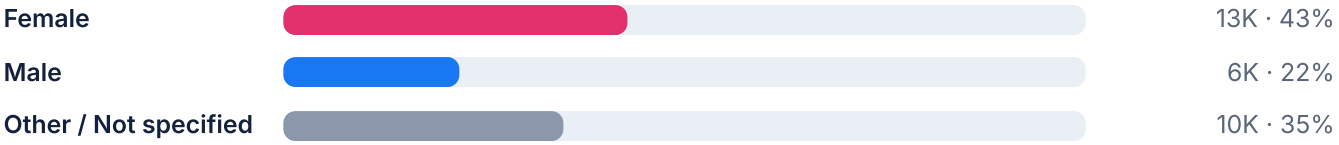

KEY INSIGHT

Ads perform strongly on visibility and engagement, but purchase efficiency is weak. Targeting and landing pages need optimisation.

- A high CTR (11.76%) and engagement rate (13.56%) show that the creatives, messaging and top-of-funnel targeting work very well. People are interested enough to click, share or comment.
- A low purchase rate (0.61%), with only 1.3K purchases from 216K impressions, shows a sharp drop-off in the lower funnel. Awareness and interest are strong, but action is weak.

Engagement Breakdown

By gender

Females engage more than males, so campaigns can be tailored towards female audiences.

By target age

Engagement peaks in the 20–30 age group, especially the early 20s, and drops significantly after 35. The primary audience is young adults.

> **INSIGHT**
> Target ads at females aged 18–30 for better ROI.

Geographic Distribution

The US, India, Brazil, Germany and the UK are the top engaged countries and the major contributors.

> **INSIGHT**
> Focus campaigns in India and the US (high potential, high engagement). Run premium campaigns in Germany and the UK, where higher purchasing power offers better conversion potential.

Time-Based Trends

Trend	Observation
Weekly engagement (stacked column)	Fairly consistent across weeks with no sharp drop. Steady engagement shows the ads keep attention.
Hourly engagement	Peaks in the late afternoon and evening (about 15:00–20:00). Lowest in the early morning (about 00:00–05:00).

> **INSIGHT**
> Schedule ad delivery in the afternoons and evenings for maximum impact.

Calendar View

Engagements are mapped to days in June. Certain dates, such as the 19th–21st and the 25th–27th, show higher activity. Campaign activity peaks on specific days, possibly due to launches or promotions.

> **INSIGHT**
> Weekly promotions and events significantly drive engagement.

Analysis by Ad Type

Ad type	Impressions	Clicks	CTR	Purchase rate	Conversion rate	Engagement rate
Carousel	48K	6K	11.7%	0.59%	5.1%	13.4%
Image	51K	6K	11.7%	0.57%	4.9%	13.5%
Stories	72K	8K	11.8%	**0.65%**	5.2%	13.6%
Video	46K	5K	**11.9%**	0.62%	**5.2%**	**13.7%**

- Video ads have the highest CTR, conversion rate and engagement rate, which makes them the best performing format.
- Stories ads also perform strongly and deliver the most impressions.
- Image and Carousel ads perform decently, with slightly lower conversions.

> **INSIGHT**
> Focus more budget on Video and Stories ads for better ROI.

Final Insights and Recommendations

1. **Fix the purchase funnel**
   Awareness and engagement are strong (high CTR and engagement rate), but purchase efficiency is low. A better conversion strategy is needed.

2. **Target the right audience**
   Females aged 18–30, especially in India and Brazil.

3. **Use the best ad formats**
   Video first, then Stories, then Carousel and Image.

4. **Get the timing right**
   Schedule ads in the afternoon and evening slots.

5. **Optimise the budget**
   Shift more spend to the high-performing geographies and ad formats.

6. **Take action on conversion**
   Improve landing pages and offers, and run retargeting campaigns to lift the purchase rate.
